

Retrofit Case Studies

A good deal of retrofit activity has taken place in the region over the past 2 years and it was felt that it would be useful to collect details of these pilot projects in order to aid dissemination of the lessons learnt.

To that end, in conjunction with WMCCE, we have assembled here a range of pilot projects of varying typology, from across the region's LEP areas. These will be published on both the SHAP and WMCCE websites, with further cost analysis and product details also available through the WMCCE online Sustainable Buildings Database, where this information has been made available.

Project	Birmingham/Solihull	Typology	
Retrofit for the future Northfield	Northfield, Birmingham	1950's - Wates system house	

Project	Coventry/Warwickshire	Typology	
Rural Innovation for the future (RIFF)	Beausale, Warwickshire	Semi-detached Property
